DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hultermans.

Hultermans (Figures 1-6) shows an optical fiber connector 10 and a method of connecting the optical connector to an optical fiber cable comprising a polished end face 40-2, a ferrule 40 with a piece of an optical fiber 42, a ferrule holder 36, a basic housing 30, a crimping ring 58, an anti-kink guard 62 and an outer housing 20. The optical fiber has an end point within the ferrule holder and can be fusion spliced to an optical fiber 14 of the optical fiber cable 12.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamakawa et al., Chang et al. and Manning et al. also show optical connectors with features similar to those of Hultermans.
